

Securing **Financial Future** through National Digital Cash.

THE VISION

At bearerCORE, we believe that economic sovereignty begins with the individual. Our mission is to bridge the gap between central bank stability and the day-to-day needs of every African citizen.

CORE PRINCIPLES

Possession Equals Ownership

By digitizing the physical cash metaphor, we enable users to hold and transfer value directly—no bank account required. Your money remains yours, stored securely on your device.

Built for Inclusion

Designed for low-literacy environments, our intuitive "Digital Money" interface replaces complex jargon with familiar metaphors, ensuring no one is left behind in the digital economy.

Sovereign & Secure

Every digital banknote is a direct liability of the National Central Bank, cryptographically signed and backed 1:1 by sovereign reserves. We provide the safety of cash with the speed of light.

Unity Across Borders

Our 54-corridor network removes the friction from cross-border trade, allowing money to flow as freely as people across the African Union.
